

Emergency Procurement Policy

Fast-Track Procurement Framework for Operational Disruptions, Stockouts & Disasters

Document Title:	Emergency Procurement Policy	Document ID:	SSE-EMG-POL-001
Version:	1.0	Status:	Approved
Effective Date:	2025-01-15	Review Date:	2026-01-15
Document Owner:	Executive Risk & Supply Chain Continuity Committee	Approval Authority:	Chief Executive Officer (CEO) & CFO

1. Purpose

This policy establishes fast-track authorization protocols for emergency procurement during severe operational disruptions, supply chain bottlenecks, or sudden stockouts of critical revenue products, while ensuring financial control and post-event accountability.

2. Emergency Qualification Criteria

Emergency procurement protocols MAY ONLY be invoked under one or more of the following explicit conditions:

- Critical Stockout Risk: Zero stock of Top 20 revenue-generating SKUs impacting customer fulfillment.
- Primary Supplier Insolvency / Failure: Sudden shutdown or disruption at a primary OEM vendor.
- Force Majeure & Natural Disasters: Severe weather, flooding, or port strikes halting logistics.
- Facility Disruption: Fire, power failure, or physical damage at a core warehouse (e.g. WH-MUM-01).

EXCLUSION RULE: Routine delays due to poor inventory planning or late requisition DO NOT qualify as emergency procurement.

3. Emergency Approval Matrix

Emergency procurement bypasses standard multi-quote delays under an accelerated dual-signoff matrix:

Emergency Purchase Threshold (INR)	Authorized Approval Pair	Processing Time Goal
Up to ₹2,00,000	Procurement Manager + Operations Head	< 4 Hours
Above ₹2,00,000	Authorized Business Head + Finance Head	< 8 Hours

4. Expedited Sourcing & Emergency Suppliers

- 4.1 Supplier Preference: Sourcing must first target pre-approved Secondary Suppliers from the ASL.
- 4.2 Non-ASL Fast-Track Onboarding: If no ASL supplier can fulfill requirements, a non-registered supplier may be engaged under an Emergency Provisional License valid for 30 days.
- 4.3 Expedited Freight: Air freight or express dedicated transport may be authorized by Logistics Head.

5. Mandatory Post-Event Review & Audit

5.1 Post-Event Review: Within 7 calendar days of emergency PO execution, the procurement lead must submit a formal Post-Event Governance Report to the Audit Committee.

5.2 Report Requirements: The report must document (a) Root cause of emergency, (b) Total financial spend, (c) Supplier selected and price variance, (d) Business impact mitigated, and (e) Long-term corrective action to prevent recurrence.
